Astronauts

NASA's astronauts have many skills and experiences that make them perfect for the variety of jobs they do both in space and on the ground. During their careers, astronauts could pilot a spacecraft, run experiments on the International Space Station, train new astronauts and even help guide other astronauts through challenging work in space from Earth.

Astronauts
 There are now U.S. astronauts who will be the first people to fly aboard commercial spacecraft from Earth and launch. They will be the first to launch from American soils (2011) when the first space shuttle fly most the crew, check out the YouTube link at <http://www.nasa.gov/pdf/136215main/090109main>
